

Bring the troops home! End the Occupation now!

Bush and Blair are in terrible trouble over Iraq.

Resistance to the occupation is growing everywhere. The Iraqi forces fighting against the occupiers are estimated at 200,000. Among the armed forces in the UK and the US there is increasing anger that they have been dragged into an illegal and dirty war.

The Iraqi elections will not give real power to the Iraqi people. All key decisions will still be made by US appointees. Critical news media like Al-Jazeera are shut down or expelled. The US has imposed a neo-liberal constitution on the Iraqis which is non-negotiable. State enterprises are being sold off to American corpora-

tions at bargain basement prices.

In Britain, opinion polls show feelings against the war are higher than ever - between 55-70% against - compared to an average of 45% around February 15th 2003. Millions who reluctantly supported the war are now feeling deceived and betrayed by Blair.

Blair's government have now spent £6 Billion of our money on their illegal war. Compare that to the sums made available for the Tsunami relief operation. We don't want our resources devoted to further destruction.

Join the demonstration on March 19th, international anti-war day, to demand an end to this illegal occupation. No more killing in our name!
